Curriculum Vitae

Name :	**Chiranjib Mondal**
ORCID ID :	0000-0002-9238-6144
Present position :	Post Doctoral Fellow, Institut d'Astronomie et d'Astrophysique, Universite Libre de Bruxelles, Brussels, Belgium Host: Prof. Nicolas Chamel and Prof. Stephane Goriely 2023 – present
e-mail :	chiranjib.mondal@ulb.be chiru.rkm@gmail.com
Place of birth :	Shyampur, West Bengal, November 24, 1988
Citizenship :	Indian
Marital Status :	Single
Languages :	Bengali, English, Hindi, Spanish (Beginner), French (Beginner)

Education:

Postdoc, 2020-2023	Laboratoire de Physique Corpusculaire de Caen, Universite de Caen-Normandie, Caen, France Host: Prof. Francesca Gulminelli
Postdoc, 2018-2020	Institut de Ciències del Cosmos, Universitat de Barcelona. Host: Prof. Mario Centelles and Prof. Xavier Viñas
PhD, 2018	Nuclear Physics, Saha Institute of Nuclear Physics **Title:** *Constraining the density dependence of symmetry energy using mean field models* Supervisor : Prof. Bijay Agrawal
Post M.Sc., 2013	Physics, Saha Institute of Nuclear Physics, India, 2012-2013 Specialization: Nuclear Physics and Field Theory

M.Sc. , 2012	Physics, Calcutta University, Kolkata, India Specialization: Nuclear Physics and Field Theory
B.Sc. , 2010	Physics, Narendrapur Ramakrishna Mission Residential College, Calcutta University, Kolkata, India
Higher Secondary, 2007	Narendrapur Ramakrishna Mission Ashrama Vidyalaya, Kolkata, India
Secondary, 2005	Narendrapur Ramakrishna Mission Ashrama Vidyalaya, Kolkata, India

5. Prof. Nicolas Chamel
   Université libre de Bruxelles
   nicolas.chamel@ulb.be

Membership and Organization:

1. Einstein Telescope collaboration with Caen-Meudon group, January 2022 onwards.

2. VIRGO collaboration with Caen-Meudon group, December 2020 onwards.

3. IReNA Online Seminar Organizing committee, 2020 – 2022.
   https://www.jinaweb.org/events/online-seminar-series

4. JINA-IReNA frontier's meeting on nuclear astrophysics,
   Organizing committee member, 21-26 May 2023, East Lansing, MI, USA.
   https://indico.frib.msu.edu/event/58/

5. QNP2024 - The 10th International Conference on Quarks and Nuclear Physics,
   Invited Convenor of Section: Equation of State and Neutron Stars, to be held 8-12 July, 2024, Barcelona, Spain. https://indico.icc.ub.edu/event/180/

Teaching:

1. GGI lecture series by young researchers, 2 lectures, June 1 & 3, 2022
   Energy density functionals in nuclear systems.
   https://www.ggi.infn.it/thlyr.pl

2. Online lecture series of 10 lectures, Dec 2020 – March 2021,
   Theoretical modeling of neutron stars.
   https://sites.google.com/view/nucleartheory/home

3. *Skyrme Hartree-Fock Approach*
   Assistant for the course offered by Prof. B. K. Agrawal during
   "School cum first collaboration meeting on computational nuclear structure and reactions",
   2-22 January, 2018, Saha Institute of Nuclear Physics, Kolkata, India.

4. *Nuclear EDF within RMF approach and their parametrizations*
   Assistant for the course offered by Prof. B. K. Agrawal during
   "SERC School on Modern Microscopic approaches in Nuclear Physics",
   17 May - 6 June, 2016, University of Srinagar, Jammu and Kashmir, India.

Referee for Journals:

1. Physical Review C, Physical Review D

2. European Physics Journal A, European Physics Journal C

3. MDPI journals.

Mentoring:

1. Master Intern Antoine Pfaff during March - July 2021.

2. Master Intern Alice Bernard during September - December 2022.

Special Documents:

1. A. Abac, Chiranjib Mondal et.al. (ET collaboration)
   (Contributed and lead two sections)
   The science of Einstein Telescope.
   arXiv: 2503.12263 (2025). https://arxiv.org/pdf/2503.12263

2. *Science with the Einstein Telescope: a comparison of different designs*
   November 2022, Einstein Telescope collaboration (available as collaboration document, also in arXiv as arXiv:2303.15923, JCAP **07**, 068 (2023)).
   Contributed in estimating uncertainties on nuclear physics parameters from possible different configurations of Einstein Telescope.

3. *Virgo_nEXT: a Vision Beyond the AdV+ project*
   May 2022, LIGO-Virgo collaboration (available as collaboration document VIR-0497A-22)
   Contributed with a concept study to detect possible signal for hadron to quark transition from gravitational waves in the post-o5 run of the LIGO-Virgo detector.

Under preparation:

1. Chiranjib Mondal and N. Chamel.
   Coexistence in nuclear bulk phase at finite temperature using Brussels Skyrme functionals.

2. Chiranjib Mondal, N. Chamel and S. Goriely.
   3D equation of state using state-of-the-art BSk functionals.

Publications:

Invited seminars:

1. *Equation of State at finite temperature in the era of new nuclear physics and multi-messenger constraints.*
2nd Workshop on modern equations of state and spectroscopy in neutron-star matter, May 26-28, 2025, Universidad de Alcalá.
https://indico.fis.ucm.es/event/32/

2. *Detectability of a phase transition in neutron star matter with third-generation gravitational wave interferometers.*
Online workshop on "Bridging the gaps: Interdiscipinary collaborations in constraining the physics of finite nuclei, neutron stars and dark matter", 3-7 July, 2023.
https://sites.google.com/view/bharatgw/workshop

3. *Studying composition of the core of neutron stars in nuclear metamodelling approach.*
   Université Libre de Bruxelles, 16 June, 2022.

4. *A flexible model for neutron star equation of state: Implication of recent observations.*
   University of Coimbra, 15 September, 2021.

5. *A flexible model for neutron star equation of state: Implication of recent observations.*
   ICCUB online seminar series, University of Barcelona, 16 June 2021.
   https://icc.ub.edu/event/a-flexible-model-neutron-star-equation-state-implica

6. *Finite nuclei to neutron stars with mean field models.*
   GANIL, University of Normandy, Caen, France, 11 February, 2020.

7. *Constraining the density dependence of symmetry energy using mean field models.*
   University of Barcelona, Spain, 3 May, 2017.

Oral Presentations:

1. *Equation of State at finite temperature in the era of new nuclear physics and multi-messenger constraints.*
   Workshop IRP ACNu, Jul 7-8, 2025, GANIL.
   https://indico.in2p3.fr/event/36119/timetable/#20250707

2. *Detectability of a phase transition in neutron star matter with third-generation gravitational wave interferometers.*
   Einstein Telescope symposium, Cagliari, Italy, 8-12 May, 2023.

3. *Detectability of a phase transition in neutron star matter with third-generation gravitational wave interferometers.*
   Einstein Telescope Paris-Caen meeting, Paris Observatory, 16 March, 2023.

4. *Detecting strong phase transitions with future tidal observations.*
   Einstein Telescope monthly OSB 6 meeting, 12 April, 2022.

5. *Can we decipher the composition of the core of a neutron star?*
   17th Rußbach School on Nuclear Astrophysics, Rußbach, Austria, 15 March, 2022.
   https://events.hifis.net/event/197/

6. *Can we decipher the composition of the core of a neutron star?*
   PhyNuBE School, Aussois, France, 9 December, 2021.
   https://indico.in2p3.fr/event/20625/timetable/

7. *The nuclear matter density functional under the nucleonic hypothesis.*
   XXIInd Colloque GANIL, Autrans, France, 28 September, 2021.
   https://www.ganil-spiral2.eu/event/22nd-colloque-ganil/

8. *A flexible model for neutron star equation of state: Implication of recent observations.*
   ChETEC MC+WG Main meeting, Lisbon, Portugal, 8 September, 2021.
   https://indico.cern.ch/event/1042362/

9. *Is tidal deformability enough to probe the high density equation of state? An analysis with meta modelling.* VIRGO week, 20 April, 2021.

10. *A flexible model for neutron star equation of state: Implication of recent observations.*
    Gravitational wave seminar series, Orsay, 15 March, 2021.

11. *Finite nuclei to neutron stars and the theory caught in between.*
    Webinar online, 21 November, 2019. https://youtu.be/O_CiEBNGyMs

12. *Symmetry energy: from finite nuclei to neutron stars.*
    Winter Meeting, University of Barcelona, 4 February, 2019.

13. *Are all models wrong: A perspective from nuclear physics.*
    Students' colloquium, Saha Institute of Nuclear Physics, 20 April, 2018.

14. *Constraining the density dependence of symmetry energy.*
    School on Frontiers in Nuclear and Hadronic Physics, GGI for Theoretical Physics, Florence, 6 March, 2018. https://www.ggi.infn.it/showevent.pl?id=283

15. *Are all models wrong?*
    CMNSR School, 20 January, 2018, Saha Institute of Nuclear Physics, Kolkata, India.
    https://indico.cern.ch/event/671249/

16. *Sensitivity analysis of nuclear energy density functional.*
    DAE Symposium on Nuclear Physics, 5 December, 2016, Saha Institute of Nuclear Physics, Kolkata, India.

17. *Constraining the symmetry energy with nuclear masses.*
    CNT Winter School on Selected Topics in Nuclear Physics, 24 February, 2016, Variable Energy Cyclotron Centre (VECC), Kolkata, India.

18. *Information content of nuclear masses: A covariance analysis.*
    DAE Symposium on Nuclear Physics, 7 December, 2015, Sri Sathya Sai Institute of Higher Learning, Puttaparti, Andhra Pradesh, India.

19. *Error estimates in theoretical models.*
    CNT Winter school on Nuclear Astrophysics, 28 January, 2015, Variable Energy Cyclotron Centre, Kolkata, India.

20. *Model dependence in the density content of nuclear symmetry energy.*
DAE Symposium on Nuclear Physics, 8 December, 2014, Banaras Hindu University, Varanasi, India.

21. *Origin of correlation between slope of symmetry energy and neutron-skin thickness.*
Summer School on Nuclear Fission and Related Phenomena, 17 May, 2014, Variable Energy Cyclotron Centre, Kolkata, India.

Conference/Workshop/School attended:

1. Thematic school on gravitational wave from neutron stars, Aussois, France,
5 - 9 June, 2023 (Poster presented).
https://indico.in2p3.fr/event/28236/

2. 30th Ecóle Joliot-Curie School, Nuclear matter under pressure, La Rochelle, France,
4 - 9 September, 2022 (Poster presented).

3. 17th Rußbach School on Nuclear Astrophysics, Rußbach, Austria, 13 - 19 March, 2022.
https://events.hifis.net/event/197/

4. PhyNuBE School, Aussois, France, 6 - 10 December, 2021.
https://indico.in2p3.fr/event/20625/

5. IWM-EC workshop, GANIL, Caen, France, 23 - 26 November, 2021.
https://indico.in2p3.fr/event/20555/

6. XXIInd Colloque GANIL, Autrans, France, 27 September - 1 October, 2021.
https://www.ganil-spiral2.eu/event/22nd-colloque-ganil/

7. ChETEC MC+WG Main meeting, Lisbon, Portugal, 8 - 10 September, 2021.
https://indico.cern.ch/event/1042362/

8. PHAROS School on "Equation of state of dense matter and multimessenger astronomy", Poland (Online participation), 13 - 19 June, 2021. https://events.ift.uni.wroc.pl/event/68/

9. ECT* Talent school on Machine learning (Online), 22 June - 3 July 2020.

10. PHAROS conference: the multi-messenger physics and astrophysics of neutron stars, Hotel Cap Roig, 22 -26 April, 2019, Platja d'Aro, Spain. https://indico.ice.csic.es/event/12/

11. Frontiers in Nuclear and Hadronic Physics, 26 February – 9 March, 2018, Galileo Galilei Institute for Theoretical Physics, Florence, Italy. https://www.ggi.infn.it/showevent.pl?id=283

12. CMNSR School, 2 - 22 January, 2018, Saha Institute of Nuclear Physics, Kolkata, India.
https://indico.cern.ch/event/671249/

13. DAE Symposium on Nuclear Physics,
    5 - 9 December, Saha institute of Nuclear Physics, Kolkata, India.

14. SERC School on Modern Microscopic approaches in Nuclear Physics,
    17 May - 6 June, 2016, University of Srinagar, Jammu and Kashmir, India.

15. BRNS workshop on evaluation of nuclear structure and decay data,
    28 Feb - 4 Mar, 2016, HBCSE-TIFR, Mumbai, India.

16. CNT Winter School on Selected topics in Nuclear Physics,
    16 - 25 Feb, 2016, Variable Energy Cyclotron Centre (VECC), Kolkata, India.

17. DAE Symposium on Nuclear Physics,
    7 - 11 December, SSIHL, Puttaparti, Andhra Pradesh, India.

18. SERC School on Modern Theories of Nuclear Structure,
    23 Feb – 5 Mar, 2015, IIT Roorkee, Roorkee, India.

19. CNT Winter School on Nuclear Astrophysics,
    19 - 30 January, 2015, Variable Energy Cyclotron Centre, Kolkata, India.

20. DAE Symposium on Nuclear Physics,
    8 - 13 December, 2014, Banaras Hindu University, Banaras, India.

21. Summer School on Nuclear Fission and Related Phenomena,
    5 - 17 May, 2014, Variable Energy Cyclotron Centre, Kolkata, India.

Skills and tools:

1. Operating system: Linux

2. Programming Languages: Fortran, C, Python
